

Washington, D.C. – U.S. Congressman Mike Pence supported H.R. 2146, the Digital Accountability and Transparency Act (DATA). This bill would increase the transparency of federal government spending and save the government almost \$1 billion through streamlining reporting processes, capping non-military travel, and recovering and preventing improper payments.

"Hoosier taxpayers have a right to know how their money is spent," said Pence. "At a time when our country is more than \$15 trillion in debt and families are making difficult financial sacrifices, we must ensure that government is held accountable and all of its spending is transparent."
